Pingdom

We used pingdom to determine the performance quality and response time of our system. The tool has given us a 74% performance grade with a 1.03s load time.

Last 7 days (21 Sep-28 Sep)
Compared to previous period (14 Sep-21 Sep)

Test interval: 30 min / Testing from: Eastern US [Edit check](#)

Below is the performance when the app is hosted on servers in other countries, and still a good performance grade is achieved. This is beneficial since it means that employees and users can still access and use the system while travelling abroad.
