Front End Projects

🔗 Online Library Management System Website (2020)

The library book website allows to browse different book categories, search for any book, and add your favorite books to a list.

🔗 Airline Reservation Website using MERN Stack (2021)

The online flight reservation system is a user-friendly website that facilitates secure and efficient booking of flights. The website is built using the MERN stack.

🔗 Movie Viewer Website (2022)

This website is designed to provide a seamless interactive user experience for browsing and finding latest movie descriptions and ratings sourced from the TMDB database API.

🔗 Vision Application (2022)

User-friendly application, designed using React Native, can search and fetch Github repositories. Users can easily add repositories to their favorites with a swipe or a simple button click.

🔗 Doctor Portal Website (2022)

The goal of this product is to give our doctors an easy way to manage appointments within their clinics and maintain their patients' histories. The portal have 2 different user privileges, one for the doctor and another for his assistant.

🔗 Simple Portofolio (2022)

My portfolio showcases my professional experience, education, and skill set in an interactive and visually appealing way.

🔗 Na7taya (2022)

Na7taya is a Arabic and English mobile app designed using React Native serving and connecting service providers (Sa7eb El Na7taya) with service seekers (ElNa7eet) for any type of service. Service seekers including freelancing handymen workers.

🔗 CV-Generator Website (2023)

This Website is designed to assist job seekers in creating professional and polished CVs easily. The user-friendly interface allows you to fill in your education, experience, skills, contacts, and projects with ease. (This Entire CV is generated using this project)
