

Beauvais, Severin 2 CITZ:EX 11:14 a.m.
Semple, Travis CITZ:EX, Jinnah, Kial CITZ:EX Any idea why this business shows as a ULC in MBR...

My List (256)

Business Name	Number	Type
0871436 B.C. UNLIMITED LIABILITY COMPANY	BC0871436	BC Unlimited Liability Com...

...But business search returns it as a BC (and different name)?

```
▼ {facets: {fields: {legalType: [{count: 1, value: "BC"}], status: [{count: 1, value: "ACTIVE"}]}},...}
  ▼ facets: {fields: {legalType: [{count: 1, value: "BC"}], status: [{count: 1, value: "ACTIVE"}]}}
  ▼ searchResults: {,-}
  ▼ queryInfo: {categories: {,-}, query: {bn: "", identifier: "", name: "", value: "bc0871436"}, rows: 20, start: 0}
  ▼ results: [{goodStanding: true, identifier: "BC0871436", legalType: "BC", name: "JIA TEST BC CORPORATION",-}]
    ▼ 0: {goodStanding: true, identifier: "BC0871436", legalType: "BC", name: "JIA TEST BC CORPORATION",-}
      goodStanding: true
      identifier: "BC0871436"
      legalType: "BC"
      name: "JIA TEST BC CORPORATION"
      score: 10.282579
      status: "ACTIVE"
      totalResults: 1
```

TS Semple, Travis CITZ:EX 11:15 a.m. Edited
probably was set to ULC via database is my guess - or an alteration?

KJ Jinnah, Kial CITZ:EX 11:17 a.m.
what env?

Beauvais, Severin 2 CITZ:EX 11:18 a.m.
Dev

KJ Jinnah, Kial CITZ:EX 11:18 a.m.
probably a syncing issue

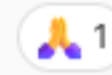

Beauvais, Severin 2 CITZ:EX 11:18 a.m. Edited
I'll create a new ULC and test it.

KJ Jinnah, Kial CITZ:EX 11:18 a.m.
there was OCP stuff going on bringing stuff down yesterday -- I'll have a look at dev

yeah dev updater needs a restart

Beauvais, Severin 2 CITZ:EX 11:21 a.m.
Who is supposed to restart that?

KJ Jinnah, Kial CITZ:EX 11:21 a.m.
I just did

working now? I saw the update go through

Beauvais, Severin 2 CITZ:EX 11:34 a.m. Edited
The original ULC is still incorrect in the search:

```
▼ {facets: {fields: {legalType: [{count: 1, value: "BC"}], status: [{count: 1, value: "ACTIVE"}]}},...}
  ▼ facets: {fields: {legalType: [{count: 1, value: "BC"}], status: [{count: 1, value: "ACTIVE"}]}}
  ▼ searchResults: {,-}
  ▼ queryInfo: {categories: {,-}, query: {bn: "", identifier: "", name: "", value: "bc0871436"}, rows: 20, start: 0}
  ▼ results: [{goodStanding: true, identifier: "BC0871436", legalType: "BC", name: "JIA TEST BC CORPORATION",-}]
    ▼ 0: {goodStanding: true, identifier: "BC0871436", legalType: "BC", name: "JIA TEST BC CORPORATION",-}
      goodStanding: true
      identifier: "BC0871436"
      legalType: "BC"
      name: "JIA TEST BC CORPORATION"
      score: 10.217864
      status: "ACTIVE"
      totalResults: 1
```

But the new ULC I created is fine:

```
▼ {facets: {fields: {legalType: [{count: 1, value: "ULC"}], status: [{count: 1, value: "ACTIVE"}]}},...}
  ▼ facets: {fields: {legalType: [{count: 1, value: "ULC"}], status: [{count: 1, value: "ACTIVE"}]}}
  ▼ searchResults: {,-}
  ▼ queryInfo: {categories: {,-}, query: {bn: "", identifier: "", name: "", value: "bc0871495"}, rows: 20, start: 0}
  ▼ results: [{goodStanding: true, identifier: "BC0871495", legalType: "ULC", name: "0871495 B.C. UNLIMITED LIABILITY COMPANY",-}]
    ▼ 0: {goodStanding: true, identifier: "BC0871495", legalType: "ULC", name: "0871495 B.C. UNLIMITED LIABILITY COMPANY",-}
      goodStanding: true
      identifier: "BC0871495"
      legalType: "ULC"
      name: "0871495 B.C. UNLIMITED LIABILITY COMPANY"
      score: 10.217864
      status: "ACTIVE"
      totalResults: 1
```

Is BC0871436 perhaps different in COLIN and LEAR?

KJ Jinnah, Kial CITZ:EX 11:37 a.m.
Oh right yeah

11:38 a.m.
business search currently only pulls BEN/CP/SP/GP from LEAR

the trickle feeder will pickup new changes from LEAR to them

but those will get overwritten by the daily import

Beauvais, Severin 2 CITZ:EX 11:39 a.m.
So it won't fix itself? Could this happen in Prod? Can we fix it in Dev?

KJ Jinnah, Kial CITZ:EX 11:39 a.m. Edited
and if it doesn't exist in COLIN it'll disappear after the next reindex (every monday morning)

Beauvais, Severin 2 CITZ:EX 11:40 a.m.
So this is due to someone updating a record directly in a db?

KJ Jinnah, Kial CITZ:EX 11:40 a.m.
No business search is expecting ULCs/BCs/etc to be in COLIN

otherwise it will never know which one is the source of truth

11:40 a.m.
we've had this convo a lot of times haha

11:41 a.m.
that was a requirement before releasong

Beauvais, Severin 2 CITZ:EX 11:41 a.m.
So it will never get synced from LEAR to COLIN?

KJ Jinnah, Kial CITZ:EX 11:41 a.m.
what do you mean?

are you talking about LEAR syncing COLIN?

Beauvais, Severin 2 CITZ:EX 11:42 a.m.
LEAR says one thing and COLIN says another. Will they get synced?

yes

KJ Jinnah, Kial CITZ:EX 11:42 a.m.
That's up to you guys, but I don't think you were implementing that last I asked argus

Beauvais, Severin 2 CITZ:EX 11:43 a.m.
ok

KJ Jinnah, Kial CITZ:EX 11:43 a.m. Edited
you will have to do that if you want to release ULCs/etc. in LEAR before importing the existing ones from colin

Beauvais, Severin 2 CITZ:EX 11:44 a.m.
Chiu, Argus CITZ:EX Any comment on the above?

AC Chiu, Argus CITZ:EX 12:45 p.m.
so looked into this a bit. i think we forgot to update the colin updater job to exclude BC LTD, ULC and CCCs from being synced back to COLIN.

from what i can see, the last sync back to COLIN is what you are seeing in business search

last successful sync with COLIN, syncing shouldn't be happening though

See less

Edited
so i think if we block sync back for BC LTD, ULC and CCCs, this will go away

Edited
it also won't show up in the business search for this scenario....except when it was a BEN on two occasions maybe
