The Future of Boost

Boost CMT

Community Maintenance Team

https://svn.boost.org/trac/boost/wiki/CommunityMaintenance

Goals

- Primary

  - Keep things building on all the supported compilers (and as many others as possible)

  - Get the test matrix "all green" and keep it that way.

  - Fix the accumulated bugs; drive the bug count to zero, and keep it there.

  - Improve the documentation for the libraries maintained by the CMT.

  - Add new features.

- Secondary

  - A long term goal of the CMT is to find maintainers for these libraries.

CMT Libraries

- Boost.ConceptCheck

- Boost.DateTime

- Boost.DisjointSet

- Boost.DynamicBitset

- Boost.Format

- Boost.Function

- Boost.Logic

- Boost.MPL

- Boost.PropertyMap

- Boost.Signals (which is deprecated)

- Boost.Tokenizer

Getting Involved

- Mailing list:

  - boost-maint@lists.boost.org

  - http://lists.boost.org/mailman/listinfo.cgi/boost-maint

- Modular Boost Development:
