

ETW's Mini guide for Russian realms (REV. 0 – 16th Feb 2024)

As many of you know, in EU there are a bunch of Russian realms as well. The only names you need to know are those below, to have you covered all the Russian realms, since they include the connected realms as well. Therefore, you need to have a character on the following realms only.

Гордунни	Gordunni (Full Pop)
Ревущий фьорд	Howling Fjord (Full Pop)
Свежеватель Душ	Soulflyer (High Pop)
Борейская тундра	Borean Tundra (connected with Blackscar!) (High Pop)
Подземье	Deephholm (low pop)
Ясневый лес	Ashenvale (low pop)
Азурегос	Azuregos (low pop)
Страж Смерти	Deathguard (low pop)
Вечная Песня	Eversong (low pop)
Дракономор	Fordragon (low pop)
Голдринн	Goldrinn (low pop)

Then, you need to have 2 accounts, or you need to have a friend who helps you transferring things to buy in those RU realms elsewhere.

So, how do I get to those RU realms?

Let's assume you have 2 accounts. You have your RU chars on Account 2 and the main Account (Account 1) with other chars.

- 1) Open the 2 Accounts in English (launch the game).
- 2) In the Account 2 client (from the game settings), set the language (both language and subs) to RU.
- 3) Close Account 2, keep Account 1 running.
- 4) Close your Battle.net client (exit) (Account 1 is still running in ENG!).
- 5) Re-open Battle.net client.
- 6) Launch Account 2, now it should be in RU.
- 7) Join the realm you want (the realm you need to buy an item from).
- 8) Since everything is in RU, you need an easier way to find the item - there are 2 possibilities:
 - a. Either you go to wowhead.com and you open the RU version on Wowhead as well, pasting the string with the item name. Example
<https://www.wowhead.com/item=36863/decahedral-dwarven-dice>
You copy paste the part in green after <https://www.wowhead.com/ru/>
So that it becomes automatically
<https://www.wowhead.com/ru/item=36863/дворфийская-десятигранная-игральная-кость>
 - b. You use PBS (Point Blank Sniper) in keys mode, which is able to find the item by looking for the id and skipping the name problem. To do so, refer to my other guide (pinned) to set up PBS correctly. This second method is significantly better in my opinion, provided you have the item in your PBS list.
- 9) After you finish on RU realms, switch back Account 2 from RU to Eng, close the game on Account 2, exit Battle.net client, and reopen it again to launch Account 2, which at this point should be in English.
