Easy documentation with Docsy

The Docsy Hugo theme lets project maintainers and contributors focus on content, not on reinventing a website infrastructure from scratch
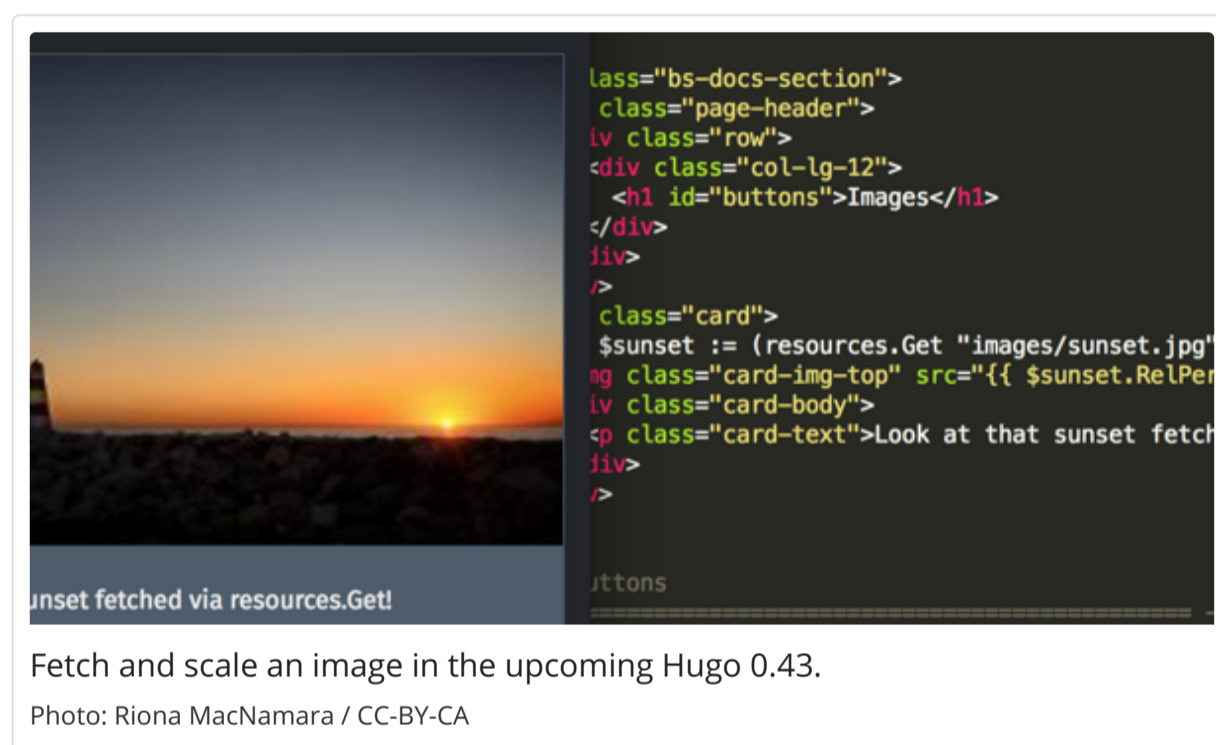

By **Riona MacNamara ([@rionam](#))** | Saturday, October 06, 2018

This is a typical blog post that includes images.

The front matter specifies the date of the blog post, its title, a short description that will be displayed on the blog landing page, and its author.

Including images

Here's an image (`featured-sunset-get.png`) that includes a byline and a caption.

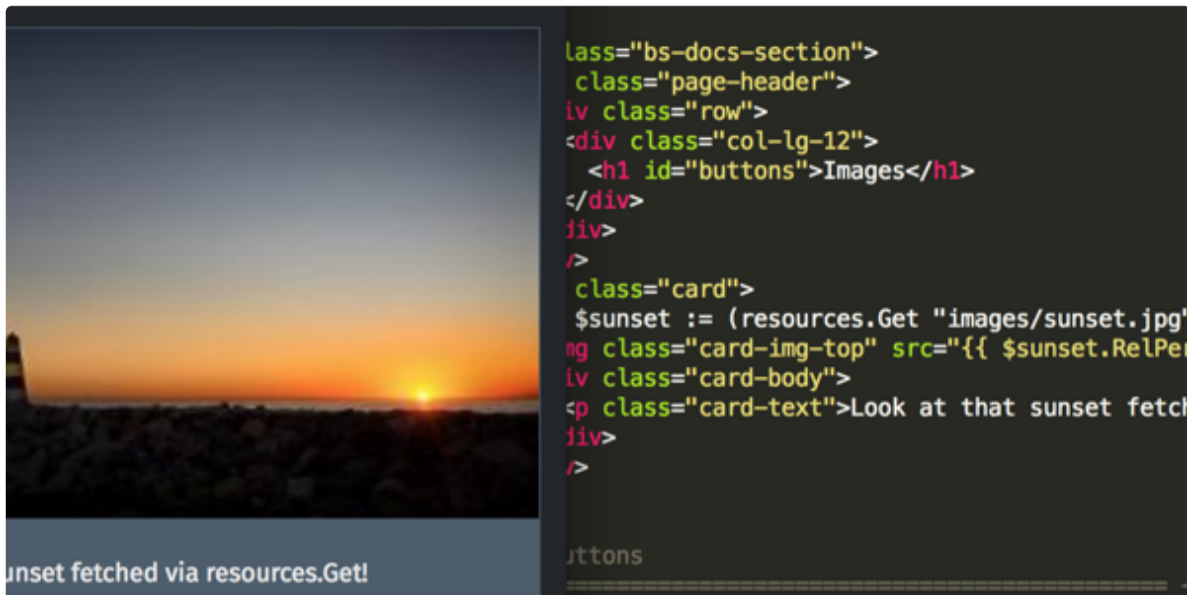

Fetch and scale an image in the upcoming Hugo 0.43.

Photo: Riona MacNamara / CC-BY-CA

The front matter of this post specifies properties to be assigned to all image resources:

```
  resources:
- src: "**.{png,jpg}"
  title: "Image #:counter"
  params:
    byline: "Photo: Riona MacNamara / CC-BY-CA"
```

To include the image in a page, specify its details like this:

Fetch and scale an image in the upcoming Hugo 0.43.

Photo: Riona MacNamara / CC-BY-CA

The image will be rendered at the size and byline specified in the front matter.
