

A sample LaTeX document

Detlef Groth, University of Potsdam

Hello LaTeX!

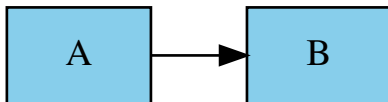

Here a Tcl example:

```
puts "Hello Tcl World!"
```

Hello Tcl World!

And here a dot example:

```
digraph g {  
  rankdir="LR";  
  node[style=filled,fillcolor=skyblue,shape=box];  
  A -> B  
}
```

Now a Pic example:

```
box wid 1.2 "Hello World!" fill 0.3;
```

This is some more text.

Let's finish with some ditaa code:

```
@startditaa
+-----+           /-----\
|  cEEF  |         |  cFEE  |
|   A   +----->>+   B   |
|         |         |         |
+-----+           \-----/
@endditaa
```

We can as well hide the code and only show the figure by using `echo=false` as code chunk argument.
