ABOUT WEBPAGE

MAKING MEANINGFUL CONNECTIONS BETWEEN STUDENTS AND TEACHERS OR SENIORS IS THE MAJOR FOCUS OF OUR WEBSITE. OUR WEBSITE NOW HAS A NUMBER OF FEATURES THAT BENEFIT BOTH PARTIES. THIS INVOLVES MONITORING PUPILS AND ASSISTING THEM IN MOVING UP THE PROFESSIONAL LADDER IN THE SECTOR OF THEIR CHOICE.

VALUES

Vision

TO UPHOLD THE HIGHEST STANDARDS OF QUALITY SO THAT WE MAY CONTINUE TO OFFER THE GREATEST EDUCATIONAL WEBSITE

Mission

TO GIVE STUDENTS MORE STRENGTH IN THE CLASSES THEY ENJOY AND TO SUPPORT THEM IN EVERY MANNER WE CAN

SERVICES

1

FEED BACK FROM SENIORS

We have a feedback system where the seniors give feedback to juniors about their performance and their weak points in respective courses

2

KEEP TRACK OF STUDENTS

We had built a functionality which helps seniors to monitor juniors and observe their performance so they guide them properly.

3

RANKING SYSTEM USING POINTS

Here we have ranking system which was decided by points system, using this functionality students can check upon themselves by checking their rank among their friends

4 PREVIOUS TECH EVENTS

We also contain list of previous tech events where a brief description about the tech event is present along with previous winners, so the students can have an idea about the events and participate in them with confidence.

5 ALUMNI NETWORK

You can also see the alumni network of the college in this webpage

6 CLASS SCHEDULING AND INFORMATION

Using this webpage we can also do the class scheduling by checking the timetables of both of the batches and send the message to the students informing about the class vacancy where there could be a class which will be taken by seniors

Welcome to AXIOS

Hello! CODE

Welcome to Axios, the technical Society of IIT Lucknow. Axios comprises seven wings encompassing all major technical domains. We are a group of highly motivated individuals with an excellent tech background.

CP Wing

Students may hone their coding abilities and get ready for competitive programming competitions by attending seminars and training sessions led by IIIT Lucknow's CP (Competitive Programming) branch.

AI & ML Wing

The AI-ML wing holds training sessions to assist students in honing their abilities in data analysis, data preprocessing, machine learning algorithms, and deep learning.

WebD Wing

The WebD wing conducts training sessions to help students improve their skills in areas such as HTML, CSS, JavaScript, and web frameworks like React, Angular, and Vue

BlockChain

The Blockchain wing provides training sessions and events to help students learn about blockchain technology and showcase their skills.

Past Events ~ AXIOS

Explore the exciting world of tech innovation through our college's past technical events conducted by our dynamic technical wing. Discover the latest advancements, network with like-minded individuals, and enhance your skills through our hands-on learning opportunities.

FOSS- Weekend

WING:
FOSS

FOSS Weekend is an annual event organized by the FOSS community of IIIT Lucknow to promote the use and development of open-source software and technologies. The event includes various workshops, talks, and hands-on sessions on different topics related to open-source. Participants get an opportunity to showcase their open-source projects

Winners of 2022:

1. Asta
2. Hinata
3. Takemichi

FAQ

Frequently Asked Questions

What is the difference between Automation and Robotics?

Automation refers to the use of technology to perform tasks that would typically require human intervention, while robotics specifically involves the use of mechanical or electromechanical devices to perform those tasks

How do I prepare for Competitive Programming?

Are Information Security and Hacking same?

No, Information Security and Hacking are not the same thing. Information security refers to the practice of protecting sensitive information from unauthorized access, use, disclosure, disruption, modification, or destruction. Hacking is the act of gaining unauthorized access and can be used to identify vulnerabilities in a system and improve its security.

What are the benefits of using Blockchain Technology?

What is the difference between Server-Side Rendering and Client-Side Rendering?

Server-side rendering involves generating HTML on the server and sending it to the client, while client-side rendering involves generating HTML on the client's device using JavaScript. Server-side rendering can improve page load times and search engine optimization, while client-side rendering can provide a more dynamic user experience.

What are some key skills that designers in a design wing should possess?
