

Vector Objects in Nav2 Maps

Alexey Merzlyakov
Samsung Research, 2023

Overall Architecture

API Details: New Services and Messages

Will update the shape, if UUID is the same as in existing one

nav2_msgs/srv/AddShapes.srv

Circle[] circles
Polygon[] polygons

bool success

nav2_msgs/srv/RemoveShapes.srv

unique_identifier_msgs/UUID[] uuids

bool success

nav2_msgs/srv/GetShapes.srv

Circle[] circles
Polygon[] polygons

nav2_msgs/msg/Polygon.msg

geometry_msgs/Point[] points
uint32 priority
bool closed
bool transparent
uint8 value
unique_identifier_msgs/UUID uuid

nav2_msgs/msg/Circle.msg

geometry_msgs/Point center
uint32 priority
bool transparent
uint8 value
unique_identifier_msgs/UUID uuid

i

uint32 priority
bool closed
bool transparent

Refer to the [Vector Objects overlays](#)

i

uint8 value (same as Costmap2D)

[0..254] range (from free cell ... to lethal obstacle);
255 – no information

Vector Objects overlays
