Performance testing

2020-05-05

Configuration

Request

URL: http://127.0.0.1:8477/test8

Method: POST

Body:

```
{"msg":{"a":"gros","b":"so","c":"modo"}}
```
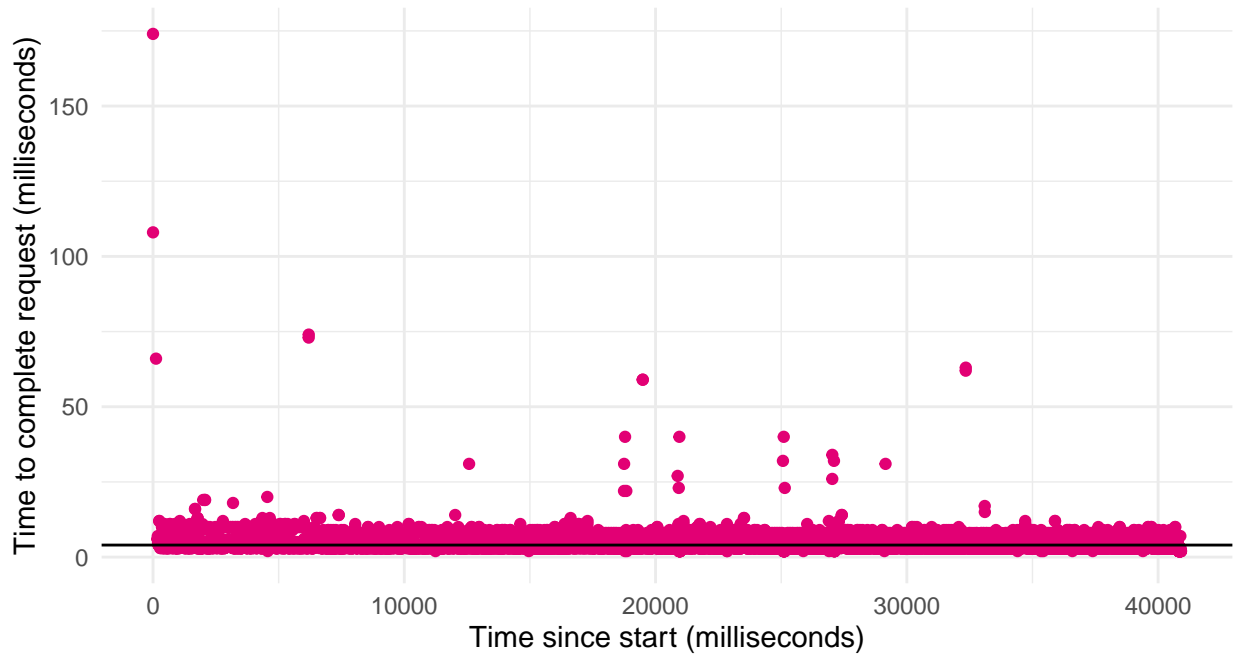

Test

- Number of threads: 2
- Number of loops per thread: 10^4
- Total number of requests: 20000
- Number of failed results: 0

Results

- Runtime: 40.912 seconds
- Response speed: 488.854 requests per second
- Median response time: 4 milliseconds
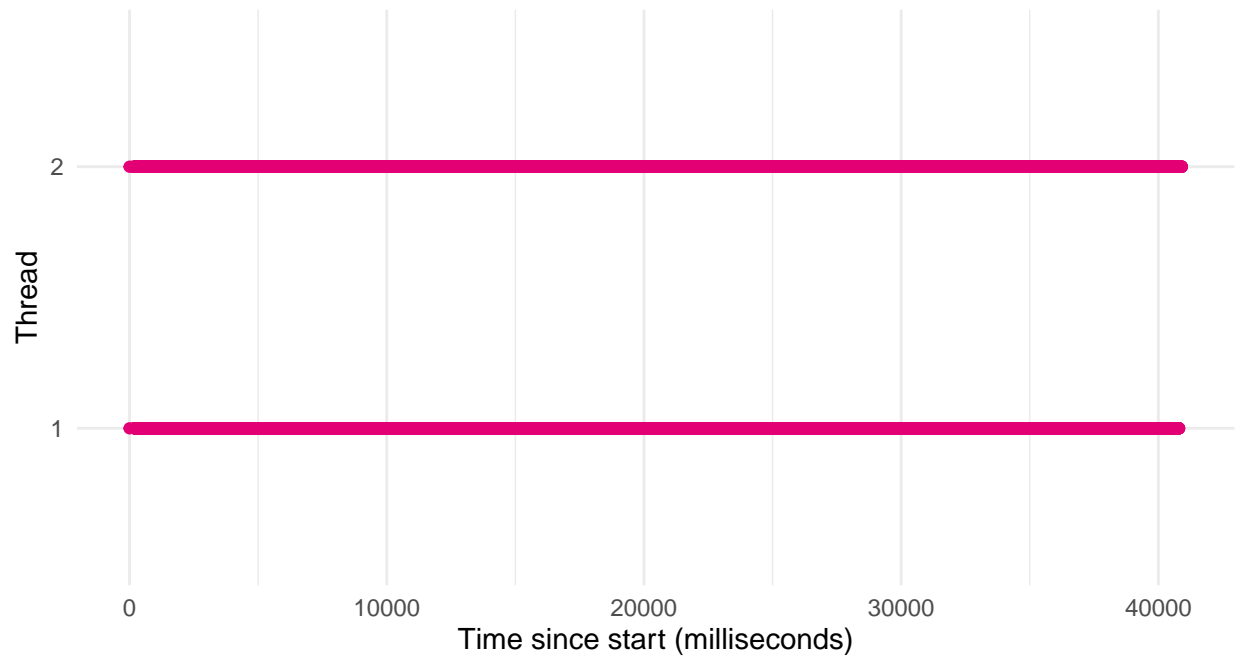

Time to complete request over duration of test

Time to complete request (milliseconds) vs Time since start (milliseconds)

Request status ● Failure ● Success

Horizontal line is the median response

Distribution of time to complete responses

Timeline of requests by thread

Thread

Time since start (milliseconds)

Request status ● Failure ● Success

Point is at time of the start of request

Distribution of number of responses within a second
