Misplaced dieresis in lotadieresis and Upsilondieresis. All weights

Should the font fix anoteleia itself? (Engines tend to convert it to periodcentered)

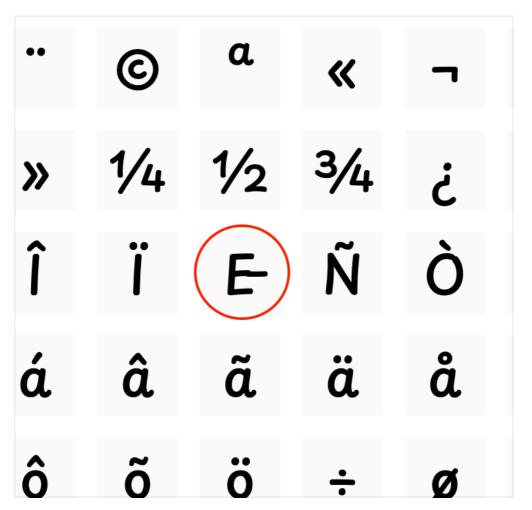

Should the font fix UC tonos itself?

## Latin (+SSA)

Problem with Eth. Dcroat and U+0189 are fine.

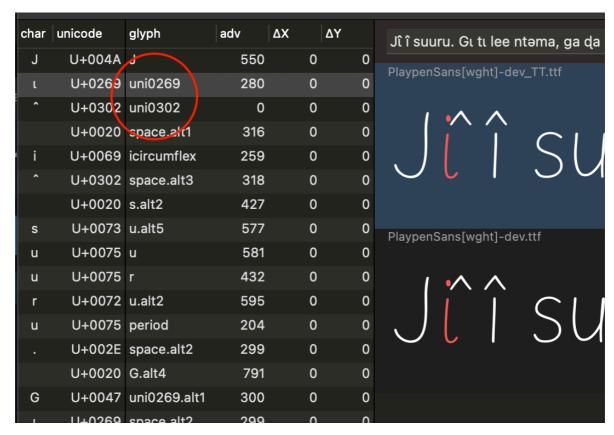

Problem with Jstroke?

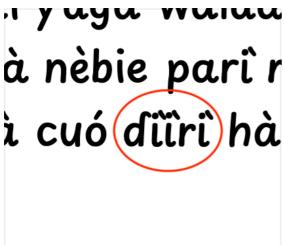

Problem with Istroke (and istroke in TT font).

I understand that vertical metrics may be important but I feel this change is a bit forced. I'd run a check with Donny Trương.

I think you should add the decomposition/composition of uni0269 in ccmp (e.g. language Anii)

Missing kerning

Problematic pair in Google's font. (Not TT one)

доторканність йо ожна людина ма №5 №9 її інстани включає свободу гію або перекона

знавати безпіоставного осягання на недоторкані путацію. Кожна людина нь. №5 №9 її інстанції г включає свободу змінн релігію або переконанн

Perhaps some better treatment for the Ukrainian ii (and ii)?

Should there be kerning here? Problem appears above wght 300
